

SOLARIS DPF 5W-30

The new generation lubricant for Renault vehicles fitted with a Diesel Particulate Filter (DPF).

SOLARIS DPF 5W-30 is an ELF high-performance synthetic technology lubricant, for the lubrication of passenger car engines. Thanks to its low level of ash, phosphorus and sulphur (low SAPS), SOLARIS DPF 5W-30 optimises post-treatment systems (in particular, the diesel particulate filter) and reduces vehicle polluting emissions. Its exceptional oxidation resistance **makes for unprecedented engine life.**

**RENAULT
RN0720**

**ACEA
C4, LEVEL C3**

PRODUCT PERFORMANCES

Compatibility with post-treatment systems

Low level of ash, phosphorus and sulphur (low SAPS)

Remarkable oxidation resistance

Very good detergency and dispersant properties

Optimal film thickness

CUSTOMER BENEFITS

More environmentally friendly

Extended Diesel Particulate Filter (DPF) life

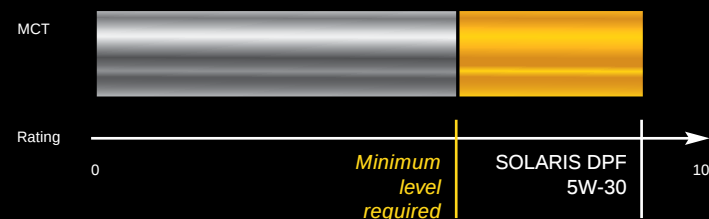

Extended oil drain interval (up to 30 000 km)

Optimum engine cleanliness both at high and low temperatures

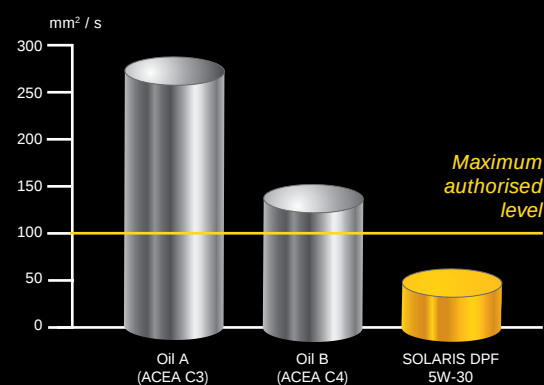

Fuel savings

The first ELF lubricant developed to meet the Renault RN0720 standard.

High temperature deposits test
Micro Coking Test

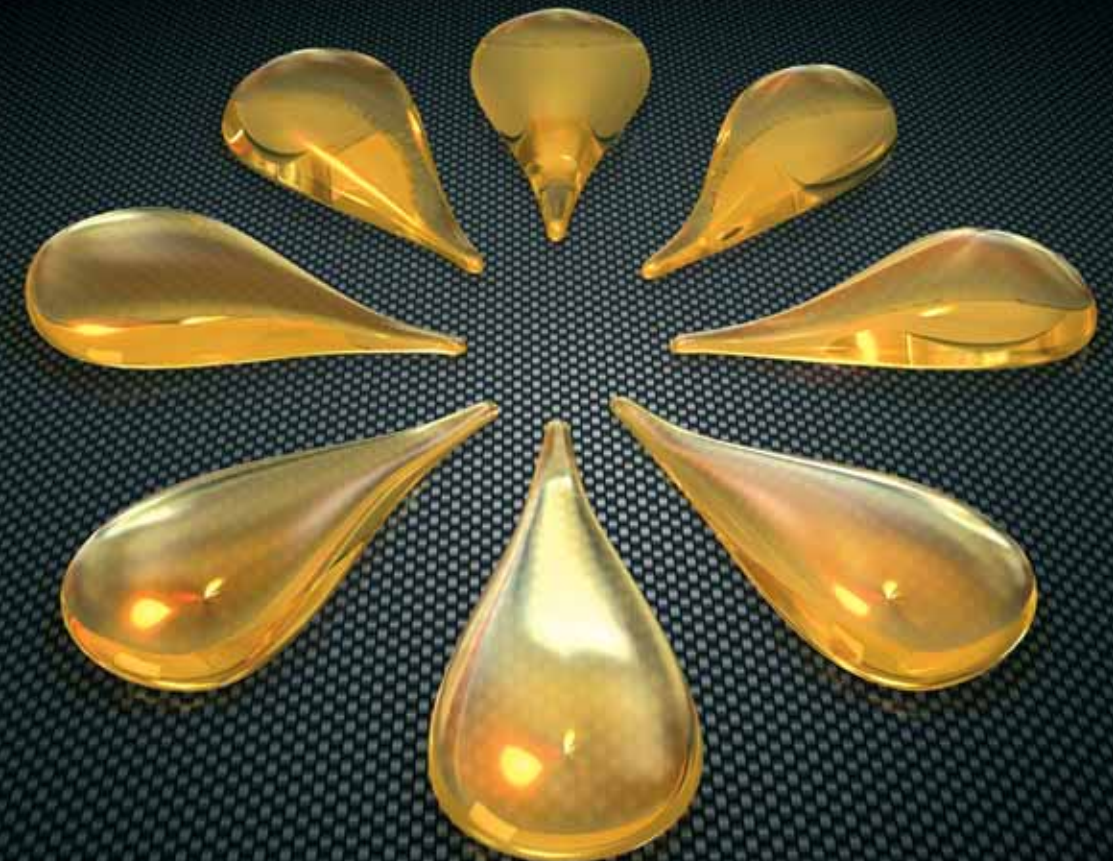

"Long Life Renault" engine test
Increased viscosity at 40° C

The oil born in Formula One

ELF TECHNOLOGY FOR RENAULT VEHICLES

Renault lubricants standards, for higher quality, reliability and customer satisfaction:

- Improved engine protection
- Advancing technology compliance
- Extended oil drain intervals

Specific tests defined by Renault's Engineering. Technical requirements above the ACEA standards* :

- High temperature deposits test
- Oxidation test
- "Long Life Renault" engine test
